Make room for a pause.

Concept schematic / not an engineering drawing

THE SHOPPER TRUTH

Long billing queues can exhaust older and pregnant shoppers with nowhere to rest.

TEST COMFORT. DON'T PRE-SELL ROI.

Source: Group 7 HCD deck, pp. 16, 23, 26. Commercial upside remains a pilot hypothesis.

Rest is not a niche concern.

~75%

flagged no seating / resting as a serious issue.

Around 50 responses.

Shared through college, relatives and family. Exploratory. Mixed retailers.

[NEEDED] THE DMART BASELINE

Incidence and any effect on baskets, visits or repeat shopping.

Source: Group 7 HCD deck, pp. 9–10, 16. Approximate survey figures; not a DMart-wide finding.

The last stretch needs a pause.

~1 hr

Shop

Fatigue starts to build.

THE LAST CHECK

Recheck

More time on feet.

THE TIGHT SPACE

Billing queue

A short rest is missing.

Let the resting point travel with the shopper.

Source: Group 7 HCD deck, pp. 14–16. Qualitative journey observations, not a timed DMart study.

Explore broadly. Choose with evidence.

01

Store friction

Seating. Loose grains. Trolleys. Navigation.

START WITH THE WHOLE SYSTEM

›

02

Customer focus

Staff / retailer primary data was unavailable.

FOLLOW THE EVIDENCE

›

03

Two seat mechanisms

Independent. Supportive. Clear flow. Daily durability.

FILTER AGAINST PRACTICAL NEEDS

[NEEDED] Documented comparison, selection scoring and why the final mechanism won.

Source: Group 7 HCD deck, pp. 4, 8, 18–22. Two mechanism ideas are shown; a scored winner is not.

Mock-ups found the risk.

BUILT TO LEARN

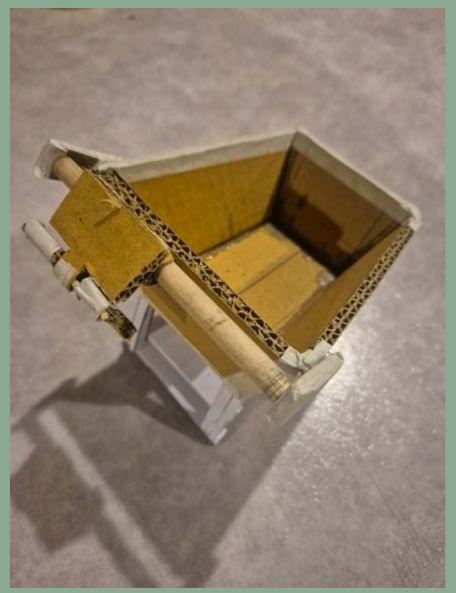

Mini mock-up → Blender models
→ mechanism proofs.

> **Seat load can move the cart.**
>
> Proposed response: stop /
> lock the wheels.

[NEEDED] PROOF BEFORE SHOPPER USE

User tests, load rating
and brake verification.

THE FIRST MOCK-UP

Source photo / cardboard model

THE DIGITAL CONCEPT

Source Blender render / not a finished product

Source: Group 7 HCD deck, pp. 20–23, 26–27. Shopper validation results are not documented.

Rest, right at the trolley.

A foldable trolley-linked resting-seat concept for a short pause.

THE SOURCE CONCEPT

01 PROPOSED USE / TO VALIDATE

Stop + secure the trolley

02 **Unfold + rest**

03 **Fold + continue**

[NEEDED] Operating sequence, brake + stability sign-off.

Source: Group 7 HCD deck, pp. 18, 23–26. Concept, not a certified product; proposed operating sequence.

Built around practical value.

Five intended functions.
Three practical benefits.
All still to validate.

01 FOLDABLE SEAT / 02 BODY-SUPPORT INTENT

Independent rest

A less tiring wait for shoppers.

03 COMPACT FORM / 04 PROPOSED WHEEL BRAKE

Flow + stability

Rest without blocking the shop.

05 FIRM, WIPE-CLEAN SURFACE

Routine upkeep

Simpler everyday cleaning.

[NEEDED] Comfort, clearance, stability and durability proof. These are intended benefits, not tested outcomes.
Source: Group 7 HCD deck, pp. 18, 23, 26.

Make a pause feel effortless.

01 / EASY TO FIND

Notice.

A visible resting option.
Bags stay nearby.

02 / EASY TO USE

Rest.

Independent use. Rounded, firm surface.
Body-support intent.

03 / EASY TO CLEAR

Resume.

Simple fold-away.
Keep the aisle and queue clear.

[NEEDED] On-trolley instructions, accessibility checks and safety validation.

Source: Group 7 HCD deck, pp. 15, 18, 23–26. Design goals, not verified capabilities; no app screens.

Comfort first.
Then the business case.

Feel

Rest uptake, feedback and safety incidents.

Baseline → target: [NEEDED]

Observation + shopper feedback.

Shop

Footfall, basket size and repeat rate.

Baselines → targets: [NEEDED]

Visit counts + transaction data.

Earn the case

Cost, incremental contribution and ROI.

ROI baseline → target: [NEEDED]

Cost + contribution tracking.

PROPOSED: PRE-PILOT BASELINE → PILOT / CONTROL → REVIEW DATES [NEEDED]

[NEEDED] Owners, definitions, repeat tracking and attribution. Proposed evaluation only; no source commercial results.

Pilot. Prove. Then decide.

THE ASK

Sponsor a safety-cleared pilot plan.

Evidence—not a rollout promise.

01 / VALIDATE

Clear safety.

[NEEDED] Brake, load, stability + aisle-fit sign-off.

02 / PILOT

Set the scope + investment.

[NEEDED] Stores, trolleys, owner, timeline + budget.

03 / DECIDE

Agree go / no-go rules.

[NEEDED] Comfort / safety thresholds, KPIs + review.

Expected outcome: a decision grounded in evidence. Quantified uplift: [NEEDED].

Proposed gates, not commitments. Protect everyday value. Source risks: Group 7 HCD deck, pp. 26–27.
